Hamberger Sanitary - Toilet seat manufacturer #1 in Europe

Founded in 1912 -
still a family
business today

8 million
toilet seats sold per
year

> 50 %
export share

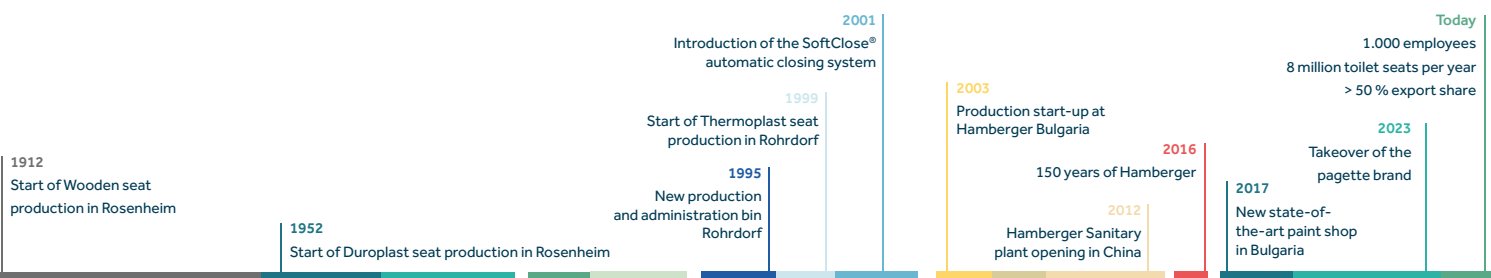

about
1,000 employees
worldwide

EXPERIENCE THE SHOWROOM INTERACTIVELY

VIRTUAL SHOWROOM HAMBERGER SANITARY ROHRDORF

Our virtual showroom offers you an insight into the world of WC seats from Hamberger Sanitary. Move intuitively or guided in the virtual room and collect impressions and inspirations. In the process, you can get to know the individual sales areas, OEM, wholesale/specialist trade and DIY. Immerse yourself in our corporate world, from the history to the product variety, you can virtually experience innovations and new products from the individual areas.

HARO

HARO - The specialized trade brand

Reliable and comfortable toilet seat solutions from the European market leader for installers and wholesalers

Thoughtful perfection

HARO® has the perfect fit for the most common ceramics. Hygiene and cleanliness through smooth, non-porous surfaces and antibacterial properties. Our toilet seats provide a comfortable and pleasant seat feeling.

What sets us apart?

**HIGHEST FUNCTIONALITY.
HIGH VERTICAL INTEGRATION.
SOLD MILLIONS TIMES OVER.**

Quality

HARO® has the highest quality standards. HARO® brand products stand for flawless functionality, perfect workmanship and maximum durability.

Service

HARO® offers the best customer experience and makes choosing the right toilet seat simpler and easier.

Design

HARO®'s product range includes excellent new developments and genuine design classics for every taste.

HARO

Our way to more sustainability

Figures, data, facts

Our production of toilet seats is very energy-intensive, which is why we are constantly working to reduce our energy consumption and increase our energy efficiency. Our ISO 14001 and ISO 5001 certifications show that we have already achieved great success in these areas.

HAMBERGER GOES GREEN
- JOIN US ON OUR WAY

Hamberger Sanitary in Rosenheim, Germany

We are already a climate-neutral company at our Rosenheim site, as we offset our remaining CO₂ emissions through a certified climate project and generate CO₂-neutral green electricity from our own biomass power plants.

Hamberger Sanitary in Sevlievo, Bulgaria

But our commitment to climate neutrality does not end in Germany. We are also improving our environmental footprint in Sevlievo, Bulgaria, by investing in photovoltaic systems.

We are the market leader in thermoset toilet seats. One third of the material used for the thermoset models consists of the renewable raw material cellulose and contributes to the conservation of resources thanks to its durability. Our production waste is recycled, for example as blasting material for paint removal.

We are proud of our achievements and are determined to continue making a significant contribution to climate protection.

Highlights

HARO® GreenLine

Every HARO® thermoplastic toilet seat can become a „green“ toilet seat.

The first „green“ toilet seat made from 100% recyclate

100% recycled and 100% sustainable

Our aim is to become even more sustainable in terms of materials. We have achieved this with the new HARO® GreenLine product line: Made from either 100% recycled industrial film (PIR) or 100% recycled plastic waste (PCR), the new models offer a truly environmentally friendly alternative. And without compromise! The new GreenLine offers functionality, durability and colour brilliance in the usual HARO® premium quality.

Sustainable packaging

100% plastic-free packaging available upon customer request

- 1 Parchment paper to protect the toilet seat
- 2 Plastic bags for hinges can be replaced by paper bags
- 3 FSC-certified cardboard 100% recyclable
- 4 Paper tape to seal the outer box

Environmental Product Declaration (EPD)

The Environmental Product Declarations (EPDs) provide quantified environmental information about the life cycle of our products to enable comparisons to be made with regard to environmental performance.

The EPDs are based on independently verified data in accordance with DIN EN 14025 (Type III, environmental labelling).

Thermoplast (PP)

Duroplast (Urea)

HARO

Highlights

AERO brings elegance to the modern bathroom

AERO - WHERE DESIGN DRAWS THE LINE.

Experience the perfect symbiosis of form and function with the new AERO toilet seat from Hamberger Sanitary.

In a world where the home is increasingly becoming a temple of relaxation, AERO heralds a new era in bathroom design. Experience how an everyday object becomes a work of art.

More on page 66

With its super-flat profile and clear, linear contours, this toilet seat not only epitomises modern living, but is also the embodiment of a futuristic vision. AERO fits seamlessly into any bathroom and almost appears to float. AERO is made from the proven high-performance material Duroplast and thus offers a pleasant, ceramic-like feel and high-quality look as well as lasting durability.

FUNCTIONALITY.

A clear speciality of the model is the optional possibility to set various accents in the back section - completely flexible according to our customers' wishes and sense of style.

Metal applications, for example in brushed stainless steel, turn every AERO into an individual design piece. The toilet seat blends in perfectly with other design elements in the bathroom, such as taps or tiles.

colour variants on request

AESTHETICS. CLARITY. PURISM. STYLE.

Highlights

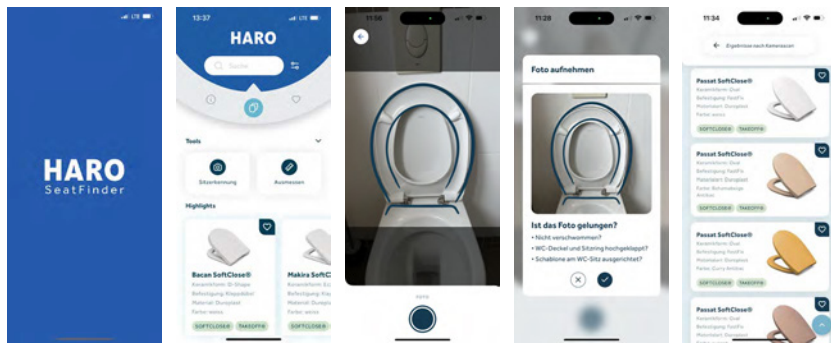

HARO toilet seat finder app

Find the right toilet seat in seconds

The HARO toilet seat finder app helps you find the right toilet seat model quickly and conveniently. The app reduces the time-consuming process of finding a replacement and improves the buying experience. The app can either clearly identify the existing HARO® toilet seat model or find a suitable new model for commercially available ceramics.

Replacement made easy AI

Thanks to intelligent image recognition using artificial intelligence (AI), a HARO® toilet seat model can be clearly identified, as each model is unique in its design. All the user has to do is take a photo of the raised toilet seat on the toilet bowl with their smartphone or tablet. In no time at all, the toilet seat is identified by the app and the model and its variants are displayed.

Quickly find the right toilet seat AR

The app user can automatically measure their toilet bowl and receive a suitable seat suggestion. The toilet bowl is scanned virtually using a smartphone or tablet. The user then receives suitable model suggestions and can view their selected toilet seat virtually on their ceramic appliance with the help of augmented reality (AR) and check whether, for example, the shape fits or the colour enhances the bathroom ambience.

An active product search and numerous filter options further expand the range of applications. The app also provides helpful product information, suitable accessories and practical installation instructions and videos. Just give it a try:

Search for HARO seat finder in your App Stores

HARO

GLOSSARY

D-Shape:	A toilet seat shaped like the letter „D“ (shape looks like a „D“ from above), the rear is straight, the sides are parallel and the front is round.
Wrapover:	The lid covers the seat ring completely when closed.
Semi-Wrapover:	The lid almost covers the seat ring when closed, but the ring is still partially visible.
Sandwich:	The lid rests on the seat ring, the seat ring is fully visible.
SLIMLINE:	Puristic and elegant, clear lines, slim design - following the trend towards minimalist shapes.
FLATDESIGN:	Installation height of just 38mm, flat design and timeless styling.
Eccentric hinges:	Hinges with a variable adjustment range in all directions (forward/backward, right/left). These hinges offer the widest variety of adjustment possibilities.
Slot-disc:	Hinges with a variable adjustment range in one direction, depending on the slot position; i.e. either forward/backward or right/left.
2-position hinges:	Hinges with a choice of two fixed positions, with the fixed value either before or behind the hole.
TakeOff® original:	Toilet seats with TakeOff® hinges can be removed and replaced with just one simple action, with the minimum use of tools. This makes cleaning very easy and therefore guarantees exceptional hygiene.
SoftClose® original:	This system closes the seat slowly and silently with just the touch of a fingertip. HARO® provides a 5-year functional warranty on the SoftClose® original action.
SoftClose® pure:	In addition to our classic automatic closing system with TakeOff this variant offers SoftClose comfort and quality at its purest form for the price-conscious customer. (non TAKEOFF)
ActiveShield®:	Reliably prevents the growth and spread of germs and bacteria with antibodies assimilated in the plastic. This invisible protective shield is skin-friendly, totally odourless and affects neither the stability nor the surface hardness or colour. Choose ActiveShield for preventive hygiene.
FastFix:	Hinge with FastFix® nuts (push onto screw, tighten with a few turns) for quick and easy installation from below, special design for quick installation
TopFix:	Simply insert the hinge from above into the ceramic holes. An expansion plug (EasyFix) or an anchor/horizontal plug allow optimum fastening of the hinge - comfortably from above.
SolidFix®:	A steadfast interlock to face the difficulties of your daily project life.
NF:	This mark certifies the compliance with the Rules of Certification NF240.
IntraLock:	Fixation of the SoftClose® damper by simply clicking it in instead of additional plastic clips.
SoftClose® integrated:	For lower installation heights and even easier cleaning, the SoftClose dampers are integrated directly into the seat. The TakeOff function and automatic closing system work reliably as usual.
	Find out more about our different fixation solutions and more detailed information on page 124.

FIXATION
SOLUTIONS

HARO

HARO® toilet seats are always the perfect fit

There are many things to consider when choosing a toilet seat. Besides the material, colour, design and function, the dimension of the ceramic is a critical aspect. HARO® models are compatible with up to 90% of standard ceramic pans. Special dimensions are no problem because, with our sophisticated hinge technology, HARO® WC Seats can be adjusted to fit special applications. In almost every case you will be able to find a suitable HARO® seat. If you need help in choosing, the HARO® sales team will be happy to assist you.

How to use the product list

Articles **with** HARO® code number:
In stock (3-4 weeks delivery time)

system	colour I
disc	alpine white
tric	517748 alpine white

Articles **without** HARO® code number:
Available, but on request (first delivery approx. 6 weeks)

The easiest way to order without HARO® code:
Just add the tool number (can be found next to the models name), colour-code (colours on the last page) and the hinge to complete an alternative order no.
Example: F3 101 C2802H >> Malong SoftClose with C2802H, alpine white

Measure your ceramic

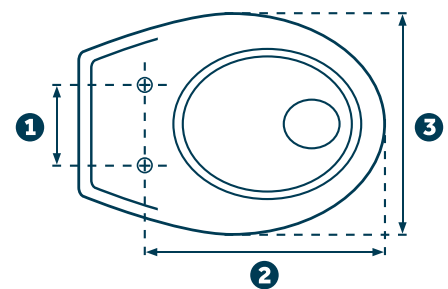

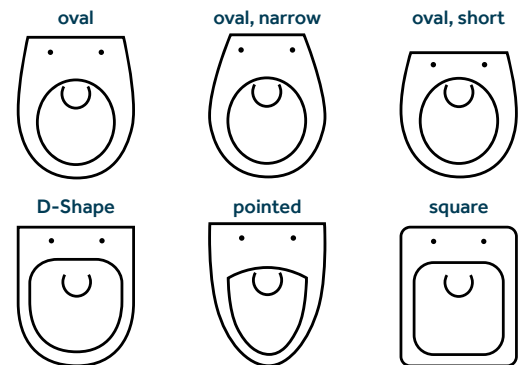

Choose the shape of your ceramic. Is it oval, D-Shape, pointed or square?

1 Measure the distance between the fixing holes in the ceramic from hole centre to hole centre. The dimensions given in this product list apply to ceramics with a hole-centre distance of 155 mm. If the hole-centre distance differs from this DIN distance, you should choose a toilet seat with an adjustable (eccentric) hinge.

2 Measure the length from hole centre to the furthest point of the front edge of the ceramic (preferably in the middle).

The effective length of a mounted toilet seat depends on its length and on the adjustment of the chosen hinge (seat length +/- adjustment possibilities of the hinge). The dimension table shows you which length adjustment each seat/hinge combination offers. Some HARO® hinges have an asymmetrical design (e.g. hook-type hinges). With these hinges, the effective length is additionally influenced by the direction in which they are installed. This means that two lengths are possible: length 1 and length 2

3 Measure the maximum width of the ceramic from outside edge to outside edge.

Length of seat depending on hinge in mm

length 1	length 2
<p>Long fitting version</p>	<p>Short fitting version</p>

HARO

Make yourself comfortable

HARO® has the perfect fit for your individual comfort zone in the bathroom

Toilet Seats since 1912

HIGHLIGHTS - NOVELTIES

A toilet seat that is both stylish and functional can significantly increase your sense of well-being in the bathroom. We offer a wide range of toilet seats that can be customised to your individual needs.

Our new products impress with proven features such as the SoftClose automatic closing mechanism, which prevents loud banging and ensures greater comfort. Our new toilet seats also have a practical TakeOff removal function, which makes cleaning quick and easy.

Starting in the lower price segment, the Punto SoftClose is an excellent choice. The Banda SoftClose on the other hand offers effortless cleaning and increased hygiene thanks to its integrated dampers. Also added to our portfolio is the brand new Aero SoftClose model. This toilet seat impresses with its modern and minimalist design.

NEW

PUNTO SoftClose®

- Modern, trendy D-Shape
- Universally applicable
- Very robust, with relatively low weight

page
74

NEW

BANDA SoftClose® integrated

- A classic reinterpreted
- Straightforward, flat design
- Easy cleaning thanks to integrated dampers

page
71

NEW

AERO SoftClose®

- Super-flat profile, clear and linear contours
- The perfect symbiosis of form and function
- Resistant and high-quality appearance

CARE NYLON AXIS

Selected **SoftClose®** seatcovers can be equipped with a CARE nylon axis (SEMI TAKEOFF) or stainless steel axis (NON TAKEOFF) together with flexible/adjustable side restraint buffers. Perfect for the public area.

Minimum yearly order quantity: 1500 pcs. for private label

Please note: not all models available in all countries.

HAROMED SOFTCLOSE

- A seat height of 5 cm makes it easy to sit down and stand up.
- The ergonomic shape of the toilet seat guarantees a comfortable seat.
- Our patented SoftClose® automatic closing system makes it easy and convenient to close the toilet lid.
- Our ACTIVE SHIELD ensures antibacterial surfaces and preventative hygiene.
- High-quality stainless steel hinges and reliable angle buffers guarantee a sturdy seat.
- A handy opening handle and an additional grab rail increase accessibility in the bathroom. This makes it easier to move from the wheelchair to the toilet.
- Thanks to their classically rounded shape and various colour combinations, the higher toilet lids have an appealing look.
- Different handle colours in blue, red or grey help with the visual perception of the grab rails for the visually impaired.
- High-quality, hard-wearing Duroplast material guarantees the reliable durability of the seats.

SOLID FIXATION SOLUTIONS

TOP ↓ FIX PLUS

- Solid stainless steel base – engineered rigidity
 - Polyethelene base – grips the ceramic for stability
 - Solid stainless steel fixing nut and thread – engineered strength for secure fixation
 - Solid stainless steel anchor clamp – engineered strength to anchor the hinge to the ceramic
- PLUS:** The nut is built into the anchor clamp with a screw lock to prevent parts from falling out!

TOP ↓ FIX

- Solid stainless steel base – engineered rigidity
- Polyethelene base – grips the ceramic for stability
- Solid stainless steel fixing nut and thread – engineered strength for secure fixation
- Solid stainless steel anchor clamp – engineered strength to anchor the hinge to the ceramic

EASY ↓ FIX

- Engineered stainless steel and nylon base creates rigidity
- Polyethelene base – grips the ceramic for stability
- Engineered nylon expansion plug system – solidly locates the hinge to aid hinge stability
- Engineered stainless steel and nylon fixing nut and solid stainless steel thread – engineered strength for secure fixation

FAST ↻ FIX

- Solid stainless steel base – engineered rigidity
- Polyethelene base – grips the ceramic for stability
- nylon bases - rigid fixation so no sideways movement
- Locking key - helps easy increased secure fit

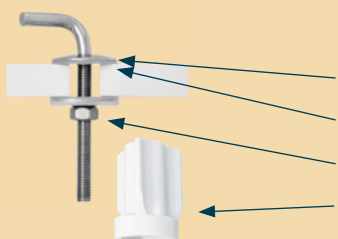

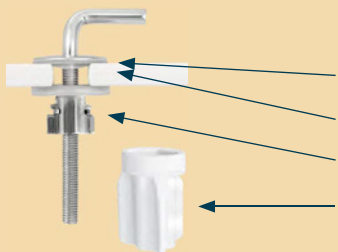

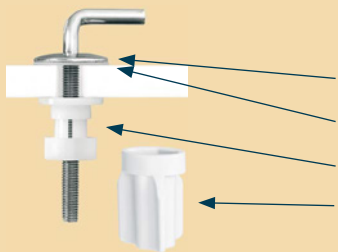

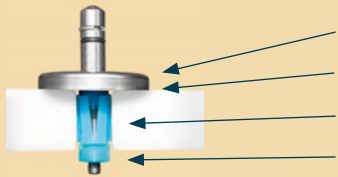

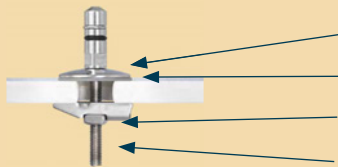

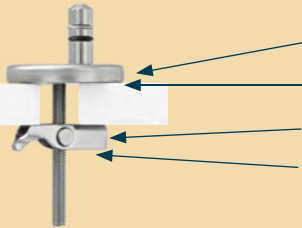

FASTFIX ↗ METAL

- Solid stainless steel base – engineered rigidity
- Polyethelene base – grips the ceramic for stability
- Stainless steel bases – rigid fixation so no sideways movement
- Locking key – helps easy increased secure fit

SOLID ↻ FIX

- Solid stainless steel base – engineered rigidity
- Polyethelene base – grips the ceramic for stability
- Stainless steel bases – rigid fixation so no sideways movement

TECHNICAL INTELLIGENCE / PROFESSIONALS CHOICE

The backbone of every toilet seat is the hinge. That's why we pay special attention to this topic and can demonstrate our love for detail. More than 350 different hinges, all produced in our own factory and predominantly with rust-free V2A stainless steel. This means: the right solution for every conceivable application! Starting from standard hook-type hinges to SOFTCLOSE hinges - there is a great range available.

This product list reflects only the most sold hinge combinations (More hinge options for your special demand on request).

Please check the QR codes beneath the respective hinges for fixing information.

Glossary

FastFix:	Hinge with FastFix® nuts (push onto screw, tighten with a few turns) for quick and easy installation from below, special design for quick installation
SolidFix®:	A steadfast interlock to face the difficulties of your daily project life.
Eccentric hinges:	Hinges with a variable adjustment range in all directions (forward/backward, right/left). These hinges offer the widest variety of adjustment possibilities.
Slot-disc:	Hinges with a variable adjustment range in one direction, depending on the slot position; i.e. either forward/backward or right/left.
2-position hinges:	Hinges with a choice of two fixed positions, with the fixed value either before or behind the hole.
SoftClose® original:	This system closes the seat slowly and silently with just the touch of a fingertip. HARO® provides a 5-year functional warranty on the SoftClose® original action.
TakeOff® original:	Toilet seats with TakeOff® hinges can be removed and replaced with just one simple action, with the minimum use of tools. This makes cleaning very easy and therefore guarantees exceptional hygiene.
TopFix:	Simply insert the hinge from above into the ceramic holes. An expansion plug (EasyFix) or an anchor/horizontal plug allow optimum fastening of the hinge - comfortably from above.
TopFix PLUS:	An extended and improved fastening solution for our classic TopFix system. The nut is built into the anchor clamp with a screw lock to prevent loose parts from falling out!

General Terms and Conditions of Hamberger Sanitary GmbH

1. General

All our legal relationships, including consulting services that are provided as part of them and are not the subject of an independent consultancy agreement, shall be governed by our General Terms and Conditions. We accept terms and conditions of purchase of our contractual partners and arrangements differing from our General Terms and Conditions only if we acknowledge in our order confirmation that they are to apply.

2. Offers/conclusion of contracts/scope of delivery

- 2.1 Our offers shall be without commitment. All the details that are part of the offer define the goods or services on the basis of a fair average grade, quality and value and are subject to deviations customary in the trade, unless they are specifically indicated as binding.
- 2.2 The same applies to offers relating to samples.
- 2.3 Orders shall not be binding until we have confirmed them in writing.
- 2.4 The details, drawings, figures, and delivery and service descriptions contained in our brochures, catalogues, price lists or the documents in and belonging to the offer are approximations that are customary in the trade, unless they are specifically indicated as binding in the order confirmation.
- 2.5 The same shall apply to the qualities of a sample.
- 2.6 We reserve the right to make changes to design and form, provided the object to be supplied is not changed significantly and the purchaser can reasonably be expected to accept the changes.

3. Prices/payment

- 3.1 Our prices are ex works, free on truck or on rail, and do not include statutory value-added tax at the applicable rate.
- 3.2 We shall be bound by the prices in our offer for 30 calendar days.
- 3.3 If there is a significant change in certain cost factors – wages, packaging material or freight – between conclusion of the transaction and delivery, the agreed price may be adjusted to reflect the impact of the relevant cost factors to a reasonable extent, but by no more than 5%. The purchaser shall have to right to cancel the contract in the event of price increases.

4. Delivery and performance times

- 4.1 Delivery periods or deadlines, which may be agreed in binding or non-binding form, must be specified in writing.
- 4.2 The point in time at which we are in delay in delivery shall be defined by the statutory provisions. However, a warning must always be received from the purchaser before that.
- 4.3 Even if binding delivery periods or deadlines have been agreed, Hamberger shall not be responsible for delays in delivery and performance due to force majeure and events that mean it is far more difficult or impossible – not just temporarily – for Hamberger to supply its goods or services; such events shall include in particular strikes, lockouts, official orders, etc., including if they occur at suppliers of Hamberger or their suppliers. They shall authorise Hamberger to postpone delivery or performance by the duration of the impediment and a reasonable start-up period or to cancel the contract wholly or in part in respect of the part of the contract not yet performed.
- 4.4 If the impediment lasts longer than three months, the purchaser shall be authorised, after setting a reasonable period of grace, to cancel the contract in respect of the part not yet performed. If the delivery period is extended or Hamberger is discharged from its obligation, the purchaser cannot derive any claims for damages therefrom. Hamberger can plead the said circumstances only if it notifies the purchaser without undue delay.
- 4.5 The rights of the purchaser under Section 8 of these GTCs and our statutory rights, in particular exclusion of the obligation to perform (such as because providing the service and/or subsequent remedy is impossible or unreasonable), shall remain unaffected.
- 4.6 Hamberger shall be authorised to provide partial deliveries and partial services at all times, unless the partial delivery or partial service is of no interest to the purchaser.
- 4.7 The purchaser must fulfil its obligations properly and on time so that the seller can comply with its delivery and performance obligations.
- 4.8 If the purchaser is in delay in accepting delivery or fails to provide cooperation or our delivery is delayed for other reasons for which the purchaser is responsible, we shall be authorised to demand reimbursement of damage we incur in this respect, including any extra costs (such as storage costs). We shall charge flat-rate compensation for such damage at 0.5% of the order amount per calendar week, but at most 5%, beginning with the start of the delay. The proof of a higher damage and our legal claims (in particular compensation for additional expenses, reasonable compensation, withdrawal and termination) shall remain unaffected; however, the lump sum shall be offset against further monetary claims. The purchaser shall be entitled to prove that we have not incurred any damage at all or that the damage is significantly less than the aforementioned lump sum.

5. Claims for defects on the part of the purchaser

- 5.1 Unless specified otherwise in the following, the statutory provisions shall apply to the purchaser's rights relating to defects or legal imperfections in title. The special statutory provisions in respect of ultimate delivery of unprocessed goods to a consumer, even if the latter has processed them further (recourse against suppliers according to Section 478 of the German Civil Code (BGB)) shall be unaffected in all cases. Claims arising from recourse against suppliers shall be excluded if the defective goods have been processed further by the purchaser or another entrepreneur, such as by being installed in another product.
- 5.2 The primary basis of our liability for defects shall be the arrangements agreed concerning the quality of the goods. Arrangements concerning the quality of the goods shall denote all product descriptions and manufacturer's specifications that are the subject matter of the individual contract or were published by us (in particular in catalogues

or on our Internet homepage) at the time the contract was concluded.

- 5.3 If the quality in question has not been agreed, it shall be necessary to assess on the basis of the statutory provisions whether a defect exists or not (Section 434 (1) Sentences 2 and 3 of the German Civil Code (BGB)). However, we do not accept liability for public statements by the manufacturer or other third parties (such as advertising statements) which the purchaser has not indicated to us as being a deciding factor in its purchase.
- 5.4 We shall be liable in respect of warranted qualities only if the purpose of the warranty is to safeguard the contractual partner specifically against the damage resulting from the absence of the quality. Reference alone to DIN or EN standards does not mean that their content shall become a warranted quality of the product.
- 5.5 If the supplied object is defective, we can first choose whether to remedy it by rectifying the defect (subsequent improvement) or by supplying an object that is free of defects (supply of a replacement). Our right to refuse remedy subject to the statutory requirements being met shall remain unaffected.
- 5.6 We shall be authorised to make the owed remedy of a defect contingent on the purchaser paying the due purchase price.
- 5.7 The purchaser shall give us the time and opportunity required to remedy the defect as owed, and in particular shall hand over the goods it has complained about so that we can inspect them. If a replacement is supplied, the purchaser shall return the defective object to us in accordance with the statutory provisions. Remedy of the defect shall not include de-installation of the defective object or re-installation of it if we were not originally obligated to install it.
- 5.8 We shall bear or refund the expenses required for the purpose of inspecting the object and remedy of a defect, in particular transport, travel, labour and material costs, as well as any de-installation and re-installation costs if applicable, in accordance with the statutory provisions, if a defect actually exists. Otherwise, we can demand that the purchaser reimburse us for the costs incurred from an unjustified request to rectify defects (in particular inspection and transportation costs), unless the fact that there is no defect was not apparent to the purchaser.
- 5.9 In urgent cases, for example if there is a risk to operational safety or to avert disproportionate damage, the purchaser shall have the right to rectify the defect itself and demand that we reimburse the costs objectively required for doing so. We must be informed about such rectification work by the purchaser itself without undue delay, where possible beforehand. The purchaser shall not have the right to carry out rectification itself and demand reimbursement of the costs for that if we were authorised to refuse such remedy of the defect in accordance with the statutory provisions.
- 5.10 If we are not able to deliver our goods or perform our service and we are to be blamed for that, the contractual partner's claim for damages shall be limited to a maximum of 10% of the value of that part of the delivery that is not able to be put into useful operation due to our inability to deliver. The right to cancel the contract shall remain unaffected.
- 5.11 The purchaser shall be entitled to claims for damages or reimbursement of futile expenses in relation to defects only in accordance with Section 8; any claims shall otherwise be excluded.

6. Product information/consulting/exclusion of warranty

- 6.1 The seller shall be liable under the statutory warranty provisions only if the defect is not attributable to improper use, treatment, care or fitting of the toilet seat.
- 6.2 Hamberger shall not assume any responsibility for the product selection made by the purchaser. In particular, the purchaser itself shall be responsible for ensuring that the product it selects meets user requirements; Hamberger explicitly points out that the selected product is not equally suitable for all application areas. In particular statements and details on the fit shall not be binding. Hamberger also does not warrant that the colours of the sold products match the colours of the materials in their intended environment.
- 6.3 Preservation of the products' function, surface and appearance depends crucially on their use, treatment, care and stressing. Hamberger refers in this regard to the care and usage instructions enclosed with every product; the purchaser is responsible for complying with them and also ensuring compliance with them when the product is resold by the purchaser.
- 6.4 Toilet seats are movable systems. The occurrence of loosening or free dimensional tolerances with resultant play does not therefore constitute a defect. It should be noted in this connection that regular re-tightening or adjustment of the fastenings may be necessary during the life of the products.

7. Other liability

- 7.1 Unless otherwise specified in these GTCs, including the following regulations, we shall be liable in accordance with the statutory provisions if we violate our contractual or non-contractual obligations.
- 7.2 We shall be liable to pay damages – regardless of the legal grounds – if we are liable for willful or grossly negligent wrongdoing. We shall be liable in the case of slight negligence – subject to statutory limitations on liability (e.g. duty of care in own matters; insignificant breach of duty) – only for damage resulting from injury to life, body or health, a) for damage resulting from violation of a cardinal contractual obligation (an obligation whose proper fulfilment constitutes a condition sine qua non for implementation of the contract and on the fulfilment of which the other party to the contract regularly relies and may rely); in this case, however, our liability shall be limited to reimbursement of the foreseeable damage that typically occurs.
- 7.3 The limitations of liability under Section 8.2 shall also apply to breaches of duty by or in favour of persons for which we are to blame under statutory provisions. They shall not apply if we have not disclosed a defect with intent to deceive or have warranted a quality of the goods, as well as to claims by the purchaser under the German Product Liability Law (*Produkthaftungsgesetz*).
- 7.4 A free right for the purchaser to terminate the contract (in particular pursuant to Sections 650 and 648 of the German Civil Code (BGB)) shall be excluded. Apart from that, the statutory provisions and legal consequences shall apply.

8. Reservation of ownership

- 8.1 We reserve ownership of the sold goods until all our current and future claims from the purchase agreement and a current business relationship have been paid in full (secured claims).
- 8.2 The goods that are subject to reservation of ownership shall not be pledged to third parties or assigned by way of security before the secured claims have been paid in full. The purchaser shall notify us in writing as soon as an application to instigate insolvency proceedings has been filed or there are any acts by third parties aimed at seizing goods belonging to us (such as attachment of them).
- 8.3 The purchaser shall be authorised to resell and/or process the goods subject to reservation of ownership in the ordinary course of business, unless such authorisation is revoked in accordance with c) below. In this case, the following provisions shall apply additionally.
 - a) The reservation of ownership shall extend to products – at their full value – created through processing of our goods or being mixed or combined with them, in which case we shall be regarded as the manufacturer. If our goods are processed, mixed or combined with goods of third parties and their right of ownership is retained, we shall acquire co-ownership of the resultant product at the ratio of the invoice values of the processed, mixed or combined goods. Apart from that, the same shall apply to the resultant product as to goods supplied subject to reservation of ownership.
 - b) The claims against third parties arising from resale of the goods or the resultant product are hereby assigned to us as security in total or to the amount of any share of co-ownership in accordance with the above subsection. We hereby accept said assignment. The purchaser's obligations specified in Section 9.2 shall also apply with regard to the assigned claims.
 - c) The purchaser shall remain authorised to collect the claim in addition to us. We undertake not to collect the claim as long as the purchaser meets its payment obligations towards us, there is no impairment to its ability to perform and meet its obligations, and we do not claim reservation of ownership by exercising a right pursuant to Section 9.3. If this is the case, however, we can demand that the purchaser inform us of the assigned claims and the parties that owe them, provide all the details required to collect the claims, hand over the associated documents and inform the parties that owe the claims (third parties) of the assignment. In such a case, we shall also be entitled to revoke the purchaser's authorisation to resell and process goods subject to reservation of ownership.
 - d) If the realisable value of the security exceeds our claims by more than 10%, we shall release security, to be chosen by us, at the purchaser's request.

9. Terms of payment

- 9.1 Our invoices shall be issued with the date of shipment. Unless otherwise agreed, they shall be due for payment without any deduction within 30 days.
- 9.2 Partial claims or partial services shall be billed separately and each shall be due for payment irrespective of the scope of the overall delivery or scope of services. Down-payments shall be offset against partial deliveries, in the sequence of the deliveries.
- 9.3 If deferred payment is granted or payments are made after they were due, interest at the level of the borrowing costs we incur can be charged as of the due date. Apart from that, the statutory provisions (Section 286 et seq. of the German Civil Code (BGB)) shall apply in the event of delay in payment. Further claims shall remain unaffected.
- 9.4 Only counterclaims that are not in dispute or have been legally established with final and binding effect may be offset. In the event of justified notifications of defects, payments may be withheld only to an extent that is reasonably proportionate to the defects that have occurred.

10. Limitation of actions

- 10.1 Contrary to Section 438 (1) No. 3 of the German Civil Code (BGB), the general period of limitation for claims due to defects and legal imperfections in title shall be one year as of delivery. If an acceptance procedure has been agreed, the period of limitation shall commence upon acceptance.
- 10.2 However, if the goods are a building or an object that has been used in a building in accordance with its customary use and said object caused the defect to the building (construction material), the period of limitation under the statutory provisions shall be 5 years as of delivery (Section 438 (1) No. 2 of the German Civil Code (BGB)). Further special statutory regulations on limitation (in particular Section 438 (1) No. 1 and (3), Section 444 and Section 445b of the German Civil Code (BGB)) shall also remain unaffected.
- 10.3 The above periods of limitation under the law on sales shall also apply to contractual and non-contractual claims for damages by the purchaser due to a defect in the goods, unless application of the standard statutory period of limitation (Sections 195 and 199 of the German Civil Code (BGB)) would result in a shorter period of limitation in the individual case. However, claims for damages by the purchaser in accordance with Section 8.2 Sentence 1 and Sentence 2 (a) and under the German Product Liability Law (*Produkthaftungsgesetz*) shall become statute-barred solely in accordance with the statutory periods of limitation.

11. Place of performance/place of jurisdiction/applicable law

- 11.1 The place of performance and place of jurisdiction for deliveries and payments (including for summary action based on a cheque or bill of exchange) and for all disputes arising between the Parties shall be 83071 Stephanskirchen, Germany, if the contractual partner is a merchant, legal entity under public law or special fund under public law. However, we shall also be authorised to take legal action against the purchaser at its domicile.
- 11.2 The relationships between the Parties shall be governed solely by the law of the Federal Republic of Germany, to the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

12. Final provisions

- 12.1 If one or more of these terms and conditions infringe a statutory prohibition or are legally invalid for other reasons, the validity of the other provisions shall not be affected thereby.
- 12.2 An arrangement corresponding as closely as possible to the economic interests and presumptive intention of the Parties to the contract, taking into account the other general terms and conditions, shall be deemed to have been agreed in place of the invalid provision. The same shall apply to a gap in these GTCs.

13. Requirement for written form

Any amendments to the purchase contract shall only be valid when given in writing. Written form shall also be necessary for any waiver of the requirement for written form.
